

Where the Conversion Leaks Are

example.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the homepage's ability to communicate a clear value proposition and trust signals to first-time visitors. Currently, the homepage above the fold fails to state what is sold or why it is better, and it lacks any trust signals such as reviews, guarantees, or security badges, leaving visitors without a reason to engage or offset purchase risk.

Prioritised findings

#	Finding	Severity	Effort	PXL
1	Missing security headers 6 of 6 standard security headers are absent, which weakens protection against XSS, clickjacking and downgrade...	Medium	Medium	6/10
2	Missing value proposition The page fails to state what is sold or why it is better, leaving visitors without a reason to engage.	High	Low	5/10
3	Generic CTA The only CTA 'Learn more' provides no indication of what the visitor will gain, failing to compel a click.	Medium	Low	5/10
4	Weak page metadata Search and social previews are degraded: page title (absent), meta description, Open Graph tags are missing...	Medium	Medium	5/10
5	Missing trust signals above the fold The homepage shows no sign of returns policy, guarantee, reviews, security badge, so a first-time visitor has...	High	Medium	5/10
6	No responsive viewport Without a viewport meta tag, mobile browsers render the desktop layout scaled down, making every tap target...	Urgent	Medium	4/10
7	No responsive viewport declared Without a viewport meta tag mobile browsers render the desktop layout scaled down, making every tap target...	Urgent	Medium	4/10
8	Missing trust signals The homepage shows no sign of returns policy, guarantee, reviews, security badge, so a first-time visitor has...	High	Medium	4/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
